Education

McMaster University

September 2022 – April 2027

Bachelors of Engineering in Software Engineering (CGPA: 3.8/4.0)

Hamilton, ON

- **Courses:** Data Structures & Algorithms, Object-Oriented Programming, Databases, Computer Architecture

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML/CSS, UML, Bash

Tools: VS Code, IntelliJ, Postman, Jira + Confluence, Microsoft Excel, Power BI, Figma

Technologies/Frameworks: Spring Boot, Node.js, React.js, Next.js, Flask, MongoDB, PostgreSQL, JUnit, Jest, GitHub, Git, AWS Certified Cloud Practitioner (In Progress), MCP

Work Experience

Software Developer Intern

May 2025 — Present

Royal Bank of Canada

Toronto, ON

- Enhanced RBC's internal developer portal by building **frontend** and **backend** plugins with **Backstage.io**, **Node.js**, **React.js**, and **MongoDB**, simplifying onboarding workflows and improving developer efficiency for **6,000+** engineers.
- **Led** migration of plugins to a centralized package management system, making development workflows cleaner and enabling **80+** engineers to build and maintain portal functionalities more efficiently.
- **Engineered an MCP server** with a reusable **prompt library** and automated GitHub repository scaffolding, cutting project setup time and boosting developer productivity.
- Developed and deployed **REST APIs** using **Python**, **AWS Lambda**, **API Gateway**, and **Serverless** to power RBC's challenge at **Hack the North 2025**.

Full Stack Developer Intern

January 2025 — April 2025

Royal Bank of Canada

Toronto, ON

- Designed and developed a full-stack **Apache Kafka** monitoring tool using **Spring Boot**, **AngularJS**, and **Redis** to track **20+** Kafka topics across **50+** deployed applications, improving real-time visibility and operational efficiency.
- Built a scalable **REST API** service within a **monorepo** architecture to ingest and cache Kafka topic data, implementing security best practices such as **AES data encryption** and **JWT authentication**.
- Gained hands-on experience with **Jenkins**, **Red Hat OpenShift**, **HashiCorp Vault**, and **Helios**, gaining familiarity with secure secret management, deployment pipelines, and cloud-based infrastructure.

Projects

Centsible | [Source Code](#)

Python, Flask, React.js, TypeScript, Gemini API, Hugging Face

- Created a chrome extension for **TechNova 2024** that simplifies financial websites by summarizing content, extracting keywords, and offering real-time chatbot explanations using Google **Gemini API** and **Hugging Face Bart** model.

Speech Assessment Tool | sunnydays.tech

Next.js, Azure Pronunciation Assessment

- Built a web-based speech assessment tool with **Azure's Pronunciation Assessment API** to evaluate English learners' fluency and pronunciation, and clarity for the **Riipen Level UP – Government of Canada** program.

McMaster Engineering Society | macengsociety.ca

Next.js, Tailwind CSS, Git, Figma

- Redesigned and optimized the booking system used by **5,000+** students, driving iterative improvements and continuous feature delivery through **Agile** practices and regular stakeholder feedback.

BollyFusion Website | bollyfusion.ca

React.js, Tailwind CSS

- Built a website boosting a small business's online presence and driving a **380%** rise in customer engagement.
